With respect to the restriction requirement mailed 28 July 2006, and the subsequent election made 14 August 2006, upon review and reconsideration of the record it is determined that there would not have been a search burden among the small number of genes recited in the claims, as argued by Applicants in the remarks filed 23 February 2007. Furthermore, the restriction requirement required later clarification, preventing Applicants from responding fully. As such, the election was thus made with traverse. In view of the lack of burden, all inventions are hereby rejoined.
